Introduction

This document serves as a step-by-step guide for setting up a JIRA Cloud helpdesk instance. By following this guide, a technical worker will be able to create a functional helpdesk environment, suitable for tracking issues, managing support requests, and organizing client interactions.

This guide assumes no prior experience with JIRA and is designed to help technicians deploy a basic helpdesk system from scratch.

Requirements

Before beginning, ensure you have the following:

- A stable internet connection
- An active Atlassian account (free to create)
- A computer with a modern browser

How to Setup a JIRA Cloud Instance

1. Create or sign in to an Atlassian Account

- Navigate to [Sign up - Try Atlassian Cloud | Atlassian](https://www.atlassian.com/try/cloud/signup?bundle=service-collection).
- Sign up for an Atlassian account with your email, then click "Sign up". If you already have an Atlassian account, click "Login" and sign in with your email.

The screenshot shows the Atlassian Service Collection sign-up page. The browser address bar displays the URL: <https://www.atlassian.com/try/cloud/signup?bundle=service-collection>. The page header features the 'Service Collection' logo. The main heading is 'Get started with Service Collection', followed by the text 'It's free for up to 3 agents - no credit card needed.' Below this is a 'Work email' input field containing 'you@company.com', with a red arrow pointing to it from the annotation 'Sign up for an Atlassian account here'. A blue 'Sign up' button is positioned below the email field. To the right of the 'Sign up' button is the text 'Or continue with', followed by four social login buttons: Google, Microsoft, Apple, and Slack. A red arrow points from the annotation 'Click here if you already have an Atlassian account.' to the 'Log in' link at the bottom of the page. The Atlassian logo is at the bottom center, and a chat icon is in the bottom right corner.

Sign up for an Atlassian account here

Click here if you already have an Atlassian account.

- c. **If you already have an Atlassian account, disregard these next steps, and continue to the next section.** You will need to verify your account. Log into the email you used to sign up and enter the six-character verification code.
- d. Next, you will need to enter your full name and create a password. After you are done, click “continue”.

Full name *

Password * 

Password must have at least 8 characters

☐ Yes! Send me news and offers from Atlassian about products, events, and more.

By signing up, I accept the Atlassian [Cloud Terms of Service](#)  and acknowledge the [Privacy Policy](#) .

Continue

One account for Jira, Confluence, Trello and [more](#) .

Your account is now setup, and you are ready to begin setting up a JIRA helpdesk.

2. Create a Workspace

- a. Now that you are signed in, you need to create a name for your workspace. The name should be unique, then click “continue”.

Sign up - Try Atlassian Cloud | Atla X

b. When asked what time of work you do, select "IT Support".

The screenshot shows a web browser window with the URL <https://www.atlassian.com/ondemand/signup/confirmation?ondemandurl=sbh...>. The page title is "Confirmation | Atlassian". The main heading is "What kind of work do you do?" with a subtext: "This helps us suggest templates that help your team do their best work." Below the heading is a grid of 14 options, each with an icon and a label. The "IT support" option, which includes a question mark icon, is circled in red. The other options are: Software development, Product management, Marketing, Design, Project management, Operations, Customer service, Human resources, Finance, Legal, Data science, Sales, and Other.

What kind of work do you do?	
Software development	Product management
Marketing	Design
Project management	Operations
IT support	Human resources
Customer service	Legal
Finance	Sales
Data science	Other

- c. When asked what your service management will be used for, select “Manage service requests.”

d. For service management templates, select “Basic IT service management”.

The screenshot shows the Jira 'Space templates' interface. On the left, a sidebar lists various categories: Custom templates (marked ENTERPRISE), Software development, Service management (highlighted with a blue bar), Marketing, Human resources, Finance, Design, Personal, Operations, Legal, Sales, Analytics, and IT. The main content area is titled 'Space templates' and 'Service management'. It includes a descriptive paragraph about empowering teams and a list of three templates. The 'Basic IT service management' template is circled in red; it is marked 'RECOMMENDED' and includes a lightning bolt icon. Below it is the 'Blank space' template, and at the bottom is the 'IT service management' template, which is marked 'PREMIUM'.

IT

Service management

Empower every team, from IT to HR to marketing, as they collect, prioritize, assign, and track incoming requests with ease. Get up and running quickly by selecting one of our tailored templates that include pre-configured workflows, forms, and settings based on service management best practices.

Basic IT service management **RECOMMENDED**

Jira Service Management

Handle and prioritize service requests, communicate with customers, and resolve issues and incidents.

Blank space

Jira Service Management

Start fresh with a blank space and customize how you manage incoming service requests.

IT service management

Jira Service Management **PREMIUM**

Everything to handle service requests, track changes, and resolve incidents, plus post-incident reviews, approval workflows, and more.

e. Select “Use template” to proceed.

Basic IT service management

All the basics for getting IT service done. Intake requests, set up alerts, raise incidents, and fix issues quickly.

Product

 Jira Service Management

Recommended for

IT teams

Any team looking to respond to requests and solve problems in a structured way

Service request types

Get IT help

Request admin access

Request a new account

Onboard new employees

Request new software

Request new hardware

Emailed request

Incident request types

Report a system problem

Report broken hardware

Resolve requests quickly

Help customers self-serve by automatically displaying knowledge base articles, and minimize noise by grouping similar work items together.

Avoid missing customer requests

Get pre-configured automations that automatically change the status of requests when customers make a comment.

On-call alerting, anytime

Ensure your service is reliable and ready to respond by creating an on-call schedule, so the right team members receive alerts when critical issues arise.

3. Service Management Template Setup

- a. To set up the service management template, choose a project name, a team type, and the channel access configuration, and click “Create project”.

The screenshot shows the 'Add project details' page in Jira. The browser address bar indicates the URL: <https://sbhanwer.atlassian.net/secure/WelcomeToSD.jspa?decorator=jsd-onboa...>. The page has a 'Back to templates' link at the top left. The form contains the following fields:

- Name ***: A text input field containing 'Typing With My Feet'. A red arrow points to this field with the label 'Enter name here'.
- Key ***: A text input field containing 'TWMF'.
- Team type ***: A dropdown menu showing 'Information technology (IT)'. A red arrow points to this dropdown with the label 'Drop down menus'.
- Channel access ***: A dropdown menu showing 'Restricted'. A red arrow points to this dropdown with the label 'Drop down menus'.

Below the form, there is a 'Template' section with a 'More templates' link. The selected template is 'Basic IT service management', which is a 'Jira Service Management' template. It includes a description: 'Handle and prioritize service requests, communicate with customers, and resolve issues and incidents.' A red arrow points to the 'Create project' button at the bottom right with the label 'Click'.

Annotations on the right side of the page include a blue curved shape and the text 'Company-managed space'.

4. Verification

You have successfully created a basic JIRA service helpdesk. You should see the name of your project in the tab.

Summary

By completing this guide, you can successfully create a functional JIRA Cloud instance, which serves as an environment for tracking issues, managing support requests, and organizing client interactions. This setup helps create a basic JIRA service helpdesk, which can be further configured.

Appendix

Glossary

Channel access: Permission setting on JIRA, controlling who is allowed to submit requests to your service desk.

Jira Cloud: Atlassian's cloud-based service management platform, used for helpdesk operations.

Project: A workspace on JIRA where issues and requests are grouped and managed.

Request: A ticket submitted by a user to the helpdesk. They can be either an issue, a question, or a service need.
